1 Complete half set of 18 even Hollows & Rounds (2-18) by Marples. Also included are two sash planes numbered 1 & 2 plus one of the first named OWT routers I've come across. No 12 R is a replacement from a different maker. G+ \$ 200-400

2 Rare and early 8 3/4" ebony and brass mortice gauge with heavy brass stock, adjustable from both ends i.e. front adjusts the pins, the back moves the fence. No markings but I'm pretty sure Fenton and Marsden held Reg 970 for this tool. Some minor age cracks, overall G/G + \$70-140

3 Unmarked screw stem plough plane, boxwood and beech with crisp edges and very good stem threads. One of the outer nuts is damaged. G \$ 50-100

4 17" beech badger plane with 2 1/4" skewed Ward cutter and dovetailed boxwood wear strip to side. Some bruising to handle and minor damage to boxing. No maker's mark. G+ \$ 60-120

183 Carter 4 1/2 smooth plane with original cutter and decal on handle. G+ \$ 20-40

184 Stanley 7 made in Australia in tatty box that has lost most of the label. Plane looks unused with minor storage marks only. F \$ 80-160

185 Lot of two Silex made in Australia butt gauges. One is painted green on one side. Both have all 3 scribes intact. G \$ 20-40

186 Late US model 5 ½ jack plane, VG rosewood, 90% japanning, minor storage marks. G \$ 50-100

Storage marks: a number of planes in this collection were stored with a thick grease coating that hardened over the years. If left unchecked moisture will get behind the grease and eventually cause pitting. You get the same effect in planes left unchecked in their original boxes. So when I mention **minor** storage marks I mean just that... a faint discolouration left after cleaning off the grease or rust - it will disappear with use and/or time.

187 Stanley 5 ¼ junior jack plane. Late model with beech handle and knob. Over 90% japanning intact. Cutter low. G+ \$ 50-100

188 Stanley 10 rabbet plane made in USA. Good rosewood, English cutter about half used. Over 90% japanning. G+ \$ 70-120

The following opportunity lots feature planes in as found condition. They all have surface rust on sides and sole. Most are complete and in good condition- others might only need minor parts and a bit of elbow grease to make them presentable. I listed all the planes I consider worth restoring or the ones that have good wood i.e. no major chips or cracks – in my opinion good wood accounts for 80% of the value in most bench planes sizes 3-6. I'm happy to just ship the wood if you don't want the plane.

end of sale

The next tool sale is planned for July 21, 2013

I'll be at the Rocky swap meet August 3, 2013. You'll find me on the oval, just opposite the pavilion.

My thanks to Dave Mills for consigning his collection. It might surprise most of you but this is my very first auction catalogue that features tools supplied by a single consignor. If you would like to see your tools sold this way please give me plenty of notice. It will cost you 10% of the hammer price plus \$ 4 per lot listing fee. For a little bit extra I'll even clean and generally make your tools more presentable.
